Houses will also be reviewed for soundness of structure and adherence to size and construction guidelines. If we must make major repairs prior to judging or if house does not meet guidelines, it will not be eligible for an award.

DISPLAY
Every effort will be made to display all entries to their best advantage; however due to limitations of our display areas, detailed interiors or backs of houses may not be visible during display. Most houses will be seen from front and side viewing. Exhibit will be on display November 22 – January 7 (Some houses may be removed prior to January 7 due to deterioration.)

CONSTRUCTION GUIDELINES

BASE
Structure should be constructed on a sturdy base (heavy cardboard, foam core or wood dependant on weight). If using cardboard, cover base with aluminum foil so that moisture from the icing does not soak into it.

SIZE
Due to limited space, we are not able to accept entries that do not adhere to these requirements:

<table>
<thead>
<tr>
<th>BASE SIZE NOT TO EXCEED 15” X 15”</th>
<th>BASE SIZE NOT TO EXCEED 18” X 18”</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Pre-School</td>
<td>- Culinary Student</td>
</tr>
<tr>
<td>- Elementary School</td>
<td>- High School</td>
</tr>
<tr>
<td>- Middle School</td>
<td>- Professional</td>
</tr>
<tr>
<td>- Children</td>
<td>- Individual Adult</td>
</tr>
<tr>
<td>- Family</td>
<td></td>
</tr>
<tr>
<td>- Non-Profit (Adult &amp; Children)</td>
<td></td>
</tr>
</tbody>
</table>

Base should only extend approximately 6” beyond the perimeter of the primary structure. We may not be able to accommodate displays with large yards or areas outside the primary structure.

STRUCTURE
- Structure cannot exceed two feet in height. We recommend small to medium size single structure houses (rather than scenes). Single structures with minimal yards are more easily viewed in our display.
- Due to the weight of the decorated house, as well as environmental conditions in the display areas, we suggest always building an infrastructure for support. This can be built from foam core or heavy cardboard, using a substantial amount of Royal Icing as “glue”. The houses are on display for an extended period of time. The combination of heat, moisture and weight will cause them to deteriorate if there is not enough support or icing used.
- No battery or electric components should be included in structure.
- Any inedible decorative objects included with your entry will NOT be returned at the end of the display.
- Use only Royal Icing. We cannot accept structures made with egg or butter icings as they quickly turn rancid and soften causing the structure to disintegrate.
- If baking gingerbread from scratch, bake several days before assembling to prevent shrinkage.
- Do not use anything on your house that requires refrigeration (such as prepared Jello, etc.)
- Use A LOT of Royal Icing to assemble and decorate. Allow each portion to dry and harden before moving.

Royal Icing Recipe

Mix Together
1 lb. powdered sugar
3 tbsp. meringue powder
1/2 tsp. cream of tartar

Add
3-1/2 oz. of water (slightly less than 1/2 cup)
Beat until icing forms stiff peaks & will hold a sharp line when knife is drawn through.

Keep covered with a damp cloth to keep icing from drying out. Work with a small amount of icing at a time. Store unused icing in a tightly closed container.

*Note: Meringue powder can be found at cake decorating or craft stores.

Makes about 2-1/2 cups

* Other recipes for Royal Icing are available on the internet; but you MUST use Royal Icing.
